Why Chelos?

The Australian Long-Necked Turtle or Chelodina Longicollis as it's known in scientific circles, is a pretty familiar sight around the slow moving rivers and ponds that populate Australian golf courses. If you have ever thought about these little critters, you would probably realise just how special they are.

Take for example, the fact that many cultures see the turtle as a symbol of prosperity, good health and good fortune.

And just between us, we think they have a couple of things in common with most golfers.

For starters, they've been known to live to a ripe old age. And just like a lot of the golfers around here, they spend most of their time in the water too.

So next time your drive ends up somewhere near the water, and you see one of our little shelled friends perched upon a rock watching, remember what you have read today, and think of that turtle as a sign of good things to come. We do. And that's why we named Chelos in their honour.
