

RADISSON ENVIRONMENTAL PRACTICES

Over the past years the hotel has incorporated numerous practices to become an environmentally friendly hotel. To date we are more aware of environmental issues and we will continue to strive for the best management practices to sustain our environment. Our accomplishments over the past years are as follows:

Cultural/Social

- Buying herbs from Liberty Children's Home
- Donate cartridges to recycle companies
- Buying bio-degradable plastic bags and disposables utensils made from corn (bio-degrades in 3 months)
- Usage of environmentally friendly cleaners

Energy Use

- Usage of mini transformer
- Recording of energy consumption
- Placement of signs in rooms to remind guest to turn off lights and televisions when leaving the room
- Keeping drapes closed to reduce heat gain during the summer
- Closure to a wing or floor, when possible, during low occupancy so it does not have to be lit or cleaned
- Unplugging of refrigerators in rooms when not in use for a period of time
- Usage of Energy Star rated office equipment

Recycle Waste

- Giving food waste to pig farmers
- Composting of coffee grounds for hotel garden
- Paper sent to Recycling Company
- Recycling of metal, tins, and aluminum scraps
- Dual valves, which allows the usage of less water when flushed has been connected to toilet systems
- Crushes bottles are used in concrete foundations

Water Use

- Immediate repairs to leaking water fixtures
- Installation of strainers and traps to prevent food from entering waste water pipes
- Providing guest with the option to reuse towels and linens which not only saves water but also labor, detergent and energy

Solid Waste

- Saving partial rolls of toilet paper and facial tissues for use in employee areas
- Reuse of damaged linens and towels for chef's scarves, kitchen aprons and rags

Generally, our aim has been to educate staff on the hotel's environmental commitment, while ensuring that Front desk and Housekeeping Personnel are able to answer all questions received by guest. Also, the hotel has made a commitment to purchase recycled products and contents when possible, and to purchase in bulk when appropriate.
